PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Major Revision: The authors have reviewed a group of references about PGD or PGT. However, the data presented in this manuscript is only fundamental concepts about PGT, and that did not offered much valuable information. Meanwhile, the manuscript also contains some conceptual errors. I suggested the authors focused on one or two main problems of PGT, such as NGS applied for detection of unbalanced and balanced chromosomal structural abnormality, and monogenic disorders, the differences of various techniques for whole genomic amplification before NGS, and so on.	
Minor REVISION comments		
Optional/General comments
