

Review Form 1.6

Journal Name:	Asian Journal of Probability and Statistics
Manuscript Number:	Ms_AJPAS_79501
Title of the Manuscript:	Impact of Measurement Error on the Power Function of Average Control Chart under Non-Normal Population
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalcjust.com/index.php/CJAST/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The idea is ok but it required major revision and you may consider the following:</p> <ol style="list-style-type: none"> 1. Why do you think measurement error exist in average control chart? 2. When data is non-normal, then how it possible that in-control values from normal population and out of control or shifted values from non-normal? Supposition that you have been made in equation (2.10). 3. How equation (2.8) and (2.16) can be merged or used together under assumption of non-normality? 4. Therefore the result are also not authentic. 5. Give real life example for implementation of this idea. 	
Minor REVISION comments		
Optional/General comments	I am not satisfied with the results and derivations of the equations.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
