#### PART 1: Review Comments

<table>
<thead>
<tr>
<th>Reviewer’s comment</th>
<th>Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</th>
</tr>
</thead>
</table>
| **Compulsory** REVISION comments | **I suggest to:**  
- Involve a translator to check the English: there are many linguistic issues among the paper that need to be revised;  
- Extend the conclusion paragraph: the reader need to read a brief summary about the main argumentative points of the article, to have a clear thread of what has been said so far  
- in order to further enhance the innovative contribution, it would be useful to expand, at least in the conclusion, the bibliographic references related to the conceptualization of health and disease within the state of the art offered by the scientific community: this type of comparison would make the argumentation offered even more stringent |
| **Minor** REVISION comments | |
| Optional/General comments | The topic of the paper is very interesting and the analysis of “The Healer” is intense and thorough. |
