PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	None	
Minor REVISION comments	I think it is better to add a Conclusion section to the manuscript.	
Optional/General comments	The paper is an important theoretical paper that derived some results on both the harmonic centrality and harmonic centralization of graphs resulting from some graph products such as Cartesian and direct products of the path P2 with any of the path Pm, cycle Cm, and fan Fm graphs. It follows the academic standards. It is very well expressed and the results are mathematically sound true, reasonable and convincing. Finally, I strongly recommend this paper for possible publication in the ARJOM.
