PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<p>Introduction is too long !!! author repeated sensitise (for example helicobacter pylori is gram negative)</p> <p>-Patient and methods.author use serological test (blood sample) for detection h.pylori antibodies!!! While he had stool sample , so stool analysis for h.pylori is more reliable.especially serological test can not detect recent or old infections.author used data of results to detect co infection of helicobacter pylori and helminths.and for reliability of detection of co infection</p> <p>Author must be sure that there is a recent infection of h pylori which cannot be achieved By serological test.</p> <p>- In table 1</p> <p>Children- male- (STH(soil-transmitted helminths) is 21while in text (3.2 Distribution of H. pylori and Soil-Transmitted Helminth Infections Paragraph 3) author mentioned STH is 20</p> <p>-In table 1 children- hookworm 3 male ;4 female and total 8 ???!</p>	
Optional/General comments	No
