

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_76680
Title of the Manuscript:	Evaluation of Quality control data of hormones using six sigma metrics tool in clinical laboratory
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	There are various technical writing issues such as spelling and punctuation errors.	
Minor REVISION comments	Explanations must be provided for industry specific terminology/abbreviations used in the paper e.g. "Bio-Rad" and "NABL"	
Optional/General comments	The paper focusses on the application of the Six Sigma metrics tool in the clinical Laboratory. The empirical analysis consists of extracting existing data and performing statistical analysis. The topic and assessment tool is important in the current industry context to ensure that the calculated values and known parameters to work against have adequate corrective actions if the results fall within the respective parameter groups.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
