

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_78059
Title of the Manuscript:	Frequency and risk factors of wound complications in type II diabetic patients undergoing abdominal surgery
Type of the Article	cross sectional study

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://peerreviewcentral.com/page/manuscript-withdrawal-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	It is a short and simple study but it is still useful. It should be waved more deeply in the discussion, if possible even of pathophysiological mechanisms or surgical technique. It must be divided statistically by each type of procedure and the number and type of complication. As the inclusion criteria are so broad, they may lose validity, both internal and external.	
Minor REVISION comments	Aside from the above, there is not much I can say additionally.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
