PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments ABSTRACT Line 7: RVG abbreviation INTRODUCTION 1- Line 12-13: For early detection.....and disease. 2- Line 13-14: Genetic markers such as PTC..... dental caries. DISCUSSION Line 26-27: This can....., requiring higher concentration and quantity of food .. perception.	Has to be set clear (Radio VisioGraphy). Needs reference. It's the conclusion of the present study and needs to be removed from the introduction. No need for a higher concentration and quantity of food for the occurrence of dental caries as cariogenic bacteria acts on food remnants in the presence of saliva and the result is dental caries which is more related to dietary habits more than food quantity.	
Minor REVISION comments INTRODUCTION Line 18-19: This trait could be used as a sign of early childhood caries (ECC) detection. Materials and Method Line 18-19: According to comparison or late maturation. DISCUSSION 1- Line 20 : A study conducted by obeseand overweight children. 2- Line 24 : The results of the current study indicate a significant 3- Line 45-55 : The resultsby Verma P, Shetty V, Hegde ³⁷ suggested that 4- Line 55 : The results of there was increase	Relationship between ECC and tasting PTC needs to be a little bit clear. Add comma (,) after comparison. Obeseand ---- obese and Indicate ---- indicated Verma P et al., there was increase --- there was an increase	
Optional/General comments Materials and Method : Study sample	In my opinion, study sample had to be of the same gender (All boys or all girls) to avoid maturity differences between males and females.
