<b>Compulsory</b> REVISION comments	<p>To be more precise related to surgical and anatomy subject and anesthesia. How can we measure length of a foramen? Please explain it with the help of a diagram. We can measure for diameter of the foramen. In conclusion of abstract it is written that approximate values are taken. These are not precise measurements. How can we rely on these values for the measurement?</p> <p>In discussion the distance are mention as between centre of stylomastoid forwmen to styloid process. Have you taken these measurements. If yes please mention the same I methods and provide values in observation...otherwise what ever reference is given is irrelevant to your findings. Have you also taken distance between centre of the stylomastoid formen to mastoid process? If yes then please mention it in methods and observation. Otherwise the reference given is irrelevant.</p>
